EXPERIENCE

Front-end Developer

LEO GRC | Jan 2018 - Present | UK

- Built more than 60 e-learning courses using JavaScript, including creating custom layouts and functionality.
- Created gamification experiences that significantly increased the levels of engagement within e-learning products.

Web Developer

Eukleia Training | Jan 2015 - Jan 2018 | UK

- Designed systems based on HTML and CSS for more than 50 e-learning products, creating the initial mock-ups until their final implementation into code.

Web Developer

Mediabug | Jan 2013 - Dec 2014 | UK

- Designed websites, landing pages and banners for more than 30 online advertising campaigns, including initial mock-ups through to implementation into coding.

Digital Designer

Airapro | Oct 2012 - Mar 2013 | Spain

- Created mock-ups and assets for the production of the tennis sports mobile app.

Digital Designer

Cinfo | Jun 2012 - Oct 2012 | Spain

- Designed and created more than 500 covers for different products on TV Digital platforms by using advanced skills in digital design.

Product Designer

1to1Design | Jan 2010 - May 2010 | Czech Rep.

- Created new illumination concepts by applying knowledge of best practice in product design and user journeys.

SKILLS

Front-end development

UI / UX Design

Web design

I work with a range of JavaScript frameworks/libraries like JQuery or React but my personal go to choice is Vue. I have experience in: user interface design, web development, gamification and accessibility. All of this supported by Git control version and Agile tools like JIRA.
